

I CINQUE REGNI

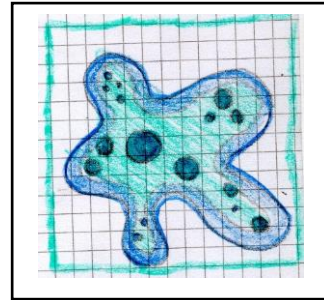

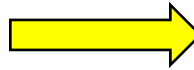

MONERE

Organismi unicellulari procarioti
cioè senza nucleo. Ad esempio:
batteri e alghe azzurre.

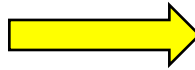

PROTISTI

Organismi unicellulari eucarioti
cioè con il nucleo. Ad esempio:
protozoi.

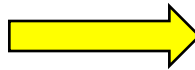

FUNGHI

Possono essere organismi
unicellulari e pluricellulari.
assorbono il nutrimento dal
terreno ma non con la fotosintesi.

PIANTE

Organismi pluricellulari che
assumono il nutrimento con la
fotosintesi clorofilliana.

ANIMALI

Organismi pluricellulari che
prendono il nutrimento da altri
organismi.
